Entergy is an integrated energy company engaged in electric power production, transmission and retail distribution operations.

Entergy Nuclear owns, operates, supports and provides management services to a national fleet of seven reactors in six locations, generating enough clean, carbon-free electricity to power more than 3.5 million homes.

With approximately 5,000 nuclear professionals in multiple states, Entergy is more than just fleet of nuclear power plants. We are a company dedicated to becoming the premier utility, while improving the lives of our customers, our communities and the environment in which we live and work.

By harnessing 100% clean nuclear energy, we can help solve the challenge of climate change, and meet the growing demands of our nation's energy needs.
