Chief Operating Officer
North

John Elnitsky
Senior Vice President
Engineering & Technical Services

Entergy is an integrated energy company engaged primarily in electric power production and retail distribution operations.

Entergy Nuclear owns, operates, supports and provides management services to a national fleet of 9 reactors in 7 locations. Pilgrim was permanently shut down on May 31, 2019 with a sale to Holtec Decommissioning International pending approval from the Nuclear Regulatory Commission.

Entergy is more than just a fleet of nuclear power plants. We are part of a company dedicated to improving our communities and the environment.

By harnessing nuclear energy, we can help solve the challenge of climate change, reduce America's dependence on foreign oil and meet the growing demands of our nation's energy needs.
